Bechtle publishes Climate Protection Strategy 2030.

Bechtle aims to meet an ambitious target of net-zero carbon emissions by 2030 through a combination of avoidance, reduction and compensation.

6 2022 outlook.

28/09/2022 | Bechtle AG | Company Presentation

2022 outlook – Forecast remains optimistic.

Assumptions.	Our vendor partners' supply issues are abating as the year progresses – but not in all product segments and not as quickly as hoped.
	Record high order backlog will gradually manifest as revenue – expected to begin in H2.
	Sustained pronounced customer interest in IT investment leads to new business momentum – economic outlook increasingly gloomy.

Realistic objectives.	Bechtle is optimistic about the business year – supported, above all, by the good development ytd.		
	Significant growth in terms of revenue/business volume and earnings (5% – 10) EBT margin on par with previous year
