## Get your Metaverse package from us.

Collaborate with your team from anywhere.

Hold face-to-face meetings and team events in the metaverse.

Work together on ideas and designs in a virtual environment.

The Metaverse is a virtual environment that is created by combining digitally enhanced, real or completely digital spaces. It embeds the computing world more and more into the real world by bringing real presence to any digital space.

With HoloLens 2 and JoinXR, you can experience the Metaverse today! The digital 3D platform offers you almost unlimited possibilities for the use as a meeting platform. Further application scenarios are the joint development of prototypes, a virtual site inspection or extraordinary team events.
