## SAM MANAGED SERVICE

### Understand your compliance

Managing software assets and maintaining compliance isn't a one-off activity. Software changes, infrastructure upgrades and new licensing schemes all require an organisation to maintain constant visibility of their software estate. That's where SAMplicity comes in! SAMplicity is an end to end SAM managed service from EasySAM, and covers all of your end point devices from the data centre to desktops / laptops, to cloud and hybrid environments, and can be delivered against a wide range of software vendors. In addition to regular compliance reporting, we also provide software optimisation recommendations, a management report, software audit defence and process and policy review and improvement.

### Only pay for what you are using

Our maturity assessment creates a baseline template of your current SAM infrastructure and maps out how we can assist to improve your SAM maturity, reduce the risk of a software vendor audit, drive down software licensing costs by as much as 30% and improve your return on investment in software. Our current managed service customers are 80% less likely to be audited by a software vendor (saving all the associated time and effort as well as unbudgeted software expenditure) and have the opportunity to resell their unused perpetual software licenses via our license buyback service!

### In more detail...

SAMplicity has saved EasySam managed service customers in excess of £560m in licensing costs. Contact us to find out more about how SAMplicity can help you!
