SAMplicity 365

How do you optimise your Office 365?

Microsoft 365 has become the de-facto standard for office applications. However, most organisations are failing to get the maximum return on investment from the extensive range of apps in the subscriptions. In tests, many large and medium size organisations can obtain up to 50% usage/efficiency improvements. Optimisation is the key to effective Saas management. With the SAMplicity 365 managed service you can effectively analyse, automate your capabilities and receive project consulting with a dedicated SAM consultant. SAMplicity 365 managed service allows you to enjoy subscription management that delivers optimal ROI on your investment!

A unique service

Microsoft 365 subscriptions are great value if the full power of the applications are used, however in most cases implementation is only partial and the following business issues occur: Partial use of key apps results in lack of productivity, Continued usage of legacy apps, No closed loop process for joiner and leavers, Wasted costs on unused subscriptions, Security threats through lack of user visibility, Non-compliance with Enterprise License agreements which cause non-budgeted costs.

In more detail ...

SAMplicity 365 is the quickest and easiest way to keep you optimised with your Microsoft Office 365 Saas applications by increasing application usage and calculating savings recommendations. SAMplicity365 enables you to recognise and manage the key factors for cost efficiencies and nonusage, encouraging an optimised environment.
