MICROSOFT HOLOLENS 2

Intelligent working with the ultimate mixed-reality headset.

HoloLens 2 offers the most comfortable and immersive mixed reality experience available, with industry-leading solutions that deliver value in minutes—all enhanced by the reliability, security, and scalability of cloud and AI services from Microsoft.

With HoloLens 2, you will see more holograms at once, whilst not compromising on the intricate details of your mixed reality environment through the greatly increased field of view and incredible resolution.

HoloLens 2 is built for comfort, with the click-to-fit system, you can spend longer immersed in your work, without having to take off your usual glasses.

Looking for a full immersive experience? Not a problem! Simply wear a headset over the HoloLens and connect via Bluetooth.

Use HoloLens 2 to touch, grasp, and move holograms in ways that feel natural - they respond a lot like real objects. Log in instantly and securely using just your eyes with Windows Hello. Voice commands work even in noisy industrial environments through smart microphones and advanced language speech processing. Move freely, with no wires or external packs to get in your way. The HoloLens 2 smart glasses are a self-contained computer with Wi-Fi connectivity, which means that everything you need goes with you while you work.

Secure

Uncomplicated

Certified

Trusted foundation.

Control access and protect your data. Run your solution on a trusted foundation.

HoloLens 2 application areas

Ever wondered how to best integrate HoloLens 2 and mixed reality into your industry? Be inspired by examples in manufacturing, healthcare and education.

The Bechtle benefit

Bechtle UK are able to offer HoloLens as a Service. On top of selling the smart glasses, we also run workshops on the effective and secure use of HoloLens 2 and offer a range of support packages.

We are happy to offer the option of a PoC (Proof of Concept) / transition project with a project manager in infrastructure integration and application. Our offer is rounded off with the support of our user help desk.

BENEFITS OF HOLOLENS 2

- » More computing power than a standard notebook.
- » Needs no external cables, markers cameras or connection to a smartphone or PC.
- » Records the user's environment and activities thanks to intelligent sensor technology.
- » Equipped with an innovative optical projection system.
- » Controlled via an Holographic Processing Unit (HPU).
- » Delivers 360° spatial sound through the built-in speaker.

WHY CHOOSE MICROSOFT HOLOLENS AND BECHTLE?

ALL FROM A SINGLE SOURCE

HoloLens smart glasses, implementation and administration workshop, 24x7, 11x5 or 8x5 support and service management.

OUR OFFER:

- » Tenant Readiness Check: Includes testing the environment (infrastructure and licences) to ensure the effective use of HoloLens 2.
- » HoloLens Integration Workshop: Central component in which the required environments are installed together with the customer.
- » Remote Assist Workshop: Demonstrates best practice use of HoloLens 2 and how file sharing works.
- » Guides Operator Workshop for the Individual User: An introduction to guides and how to control them.
- » Guides Autor Workshop for Admins: An insight into guide settings, documents and the installation of 3D models and holograms.
- » 1st Level Support: You receive support in areas ranging from the use, questions related to functionality, issues and operating problems, warranty claims due to defective hardware, to contacting Microsoft and blocking / wiping HoloLens 2 via the management software in the event of loss or theft.
- » 2nd level support: In addition to 1st level support, we can reset your device passwords via the management software, make configuration adjustments as required and subsequently install coordinated apps in accordance with an application list.
