HP TECHPULSE

30 DAY **FREE** TRIAL & REPORT

How much time does your organisation spend managing the day-to-day device fleet? More importantly, what is the cost?

Bechtle understand the pressures IT are under to keep systems running in an ever-changing technology landscape. To tackle these challenges you need to be able to identify potential issues long before they become a problem. By doing this, you can reduce the demand on IT and downtime of users.

Bechtle have partnered with HP to deliver a leading predictive analytics solution – HP TechPulse in conjunction with Device as a Service proactive management. The multi OS and vendor agnostic software allows you to give back time to IT, give your end users a better experience, and provide detailed proactive reporting on performance across your device fleet.

Bechtle are offering a 30 day free trial of TechPulse, which enables you to see the tool working with live data on your own environment, working alongside your existing setup. In addition, Bechtle will produce a report to demonstrate the potential savings that TechPulse and DaaS can bring.
