Logitech CollabOS Integration Feature Spotlight

Remote UI Access for
Logitech CollabOS devices

logitech

Interact and control Logitech CollabOS devices without being physically in the room. Powered by GoTo Resolve, remote UI access gives IT professionals and administrators easy and unrestricted remote access to manage and troubleshoot in-room devices at scale.

Hands-On Control

Conduct general device management, technical troubleshooting, white glove meeting support and more, remotely.

Simple Setup

Quickly enable access via the CollabOS settings menu and pair the device with your GoTo Resolve account.

Unique Security

Protect your devices and connections with the industry's first-of-its-kind, zero trust access control.

Compatible with: Rallybar, Rallybar mini, Roommate, Tap IP and Tap Scheduler
