

TEAMS GOVERNANCE WITH PERSPICUITY

With the rapid move to remote working there has been a massive move to digital tools which enable great collaboration. Key to this is the introduction of Microsoft Teams to an organisation where commonly meetings, chat conversations and document sharing takes place.

But the lifecycle of Teams following 'Initiate', 'Active' through to 'Sunset' is not being followed and this results in content growth along with disorganised and inconsistent information.

Why Teams Governance?

In partnership with Perspicuity, we will ensure you have a clear understanding of what is required during the engagement, for you to gain a good understanding of what Teams Governance entails. The lifecycle and adoption approach to ensuring you are successful whilst also covering the important security considerations.

We will assess your organisation's attitude towards governance, your current governance posture, as well as work to understand what features you need configuring.

- Review Governance controls
- Improve Security
- Support Innovation in Service

As the growth of new Apps and Services integrate with Teams, this package offers experiences and recommendations to make Teams ready for the future while ensuring the Governance and Security are all maintained.

Get insights into the latest developments in the Microsoft Cloud including actionable advice that'll enable you to keep your organisation secure, productive and up-to-date
